

A BREATH OF FRESH AIR ON SINGAPORE'S WALL STREET

An address with a glorious legacy, the former UIC Building located at five Shenton Way dominated the city skyline as Singapore's tallest building for many years since its completion in 1973.

Today, the area is undergoing rejuvenation and transformation with the completion of several notable projects including One Raffles Quay, Marina Bay Financial Centre and Asia Square.

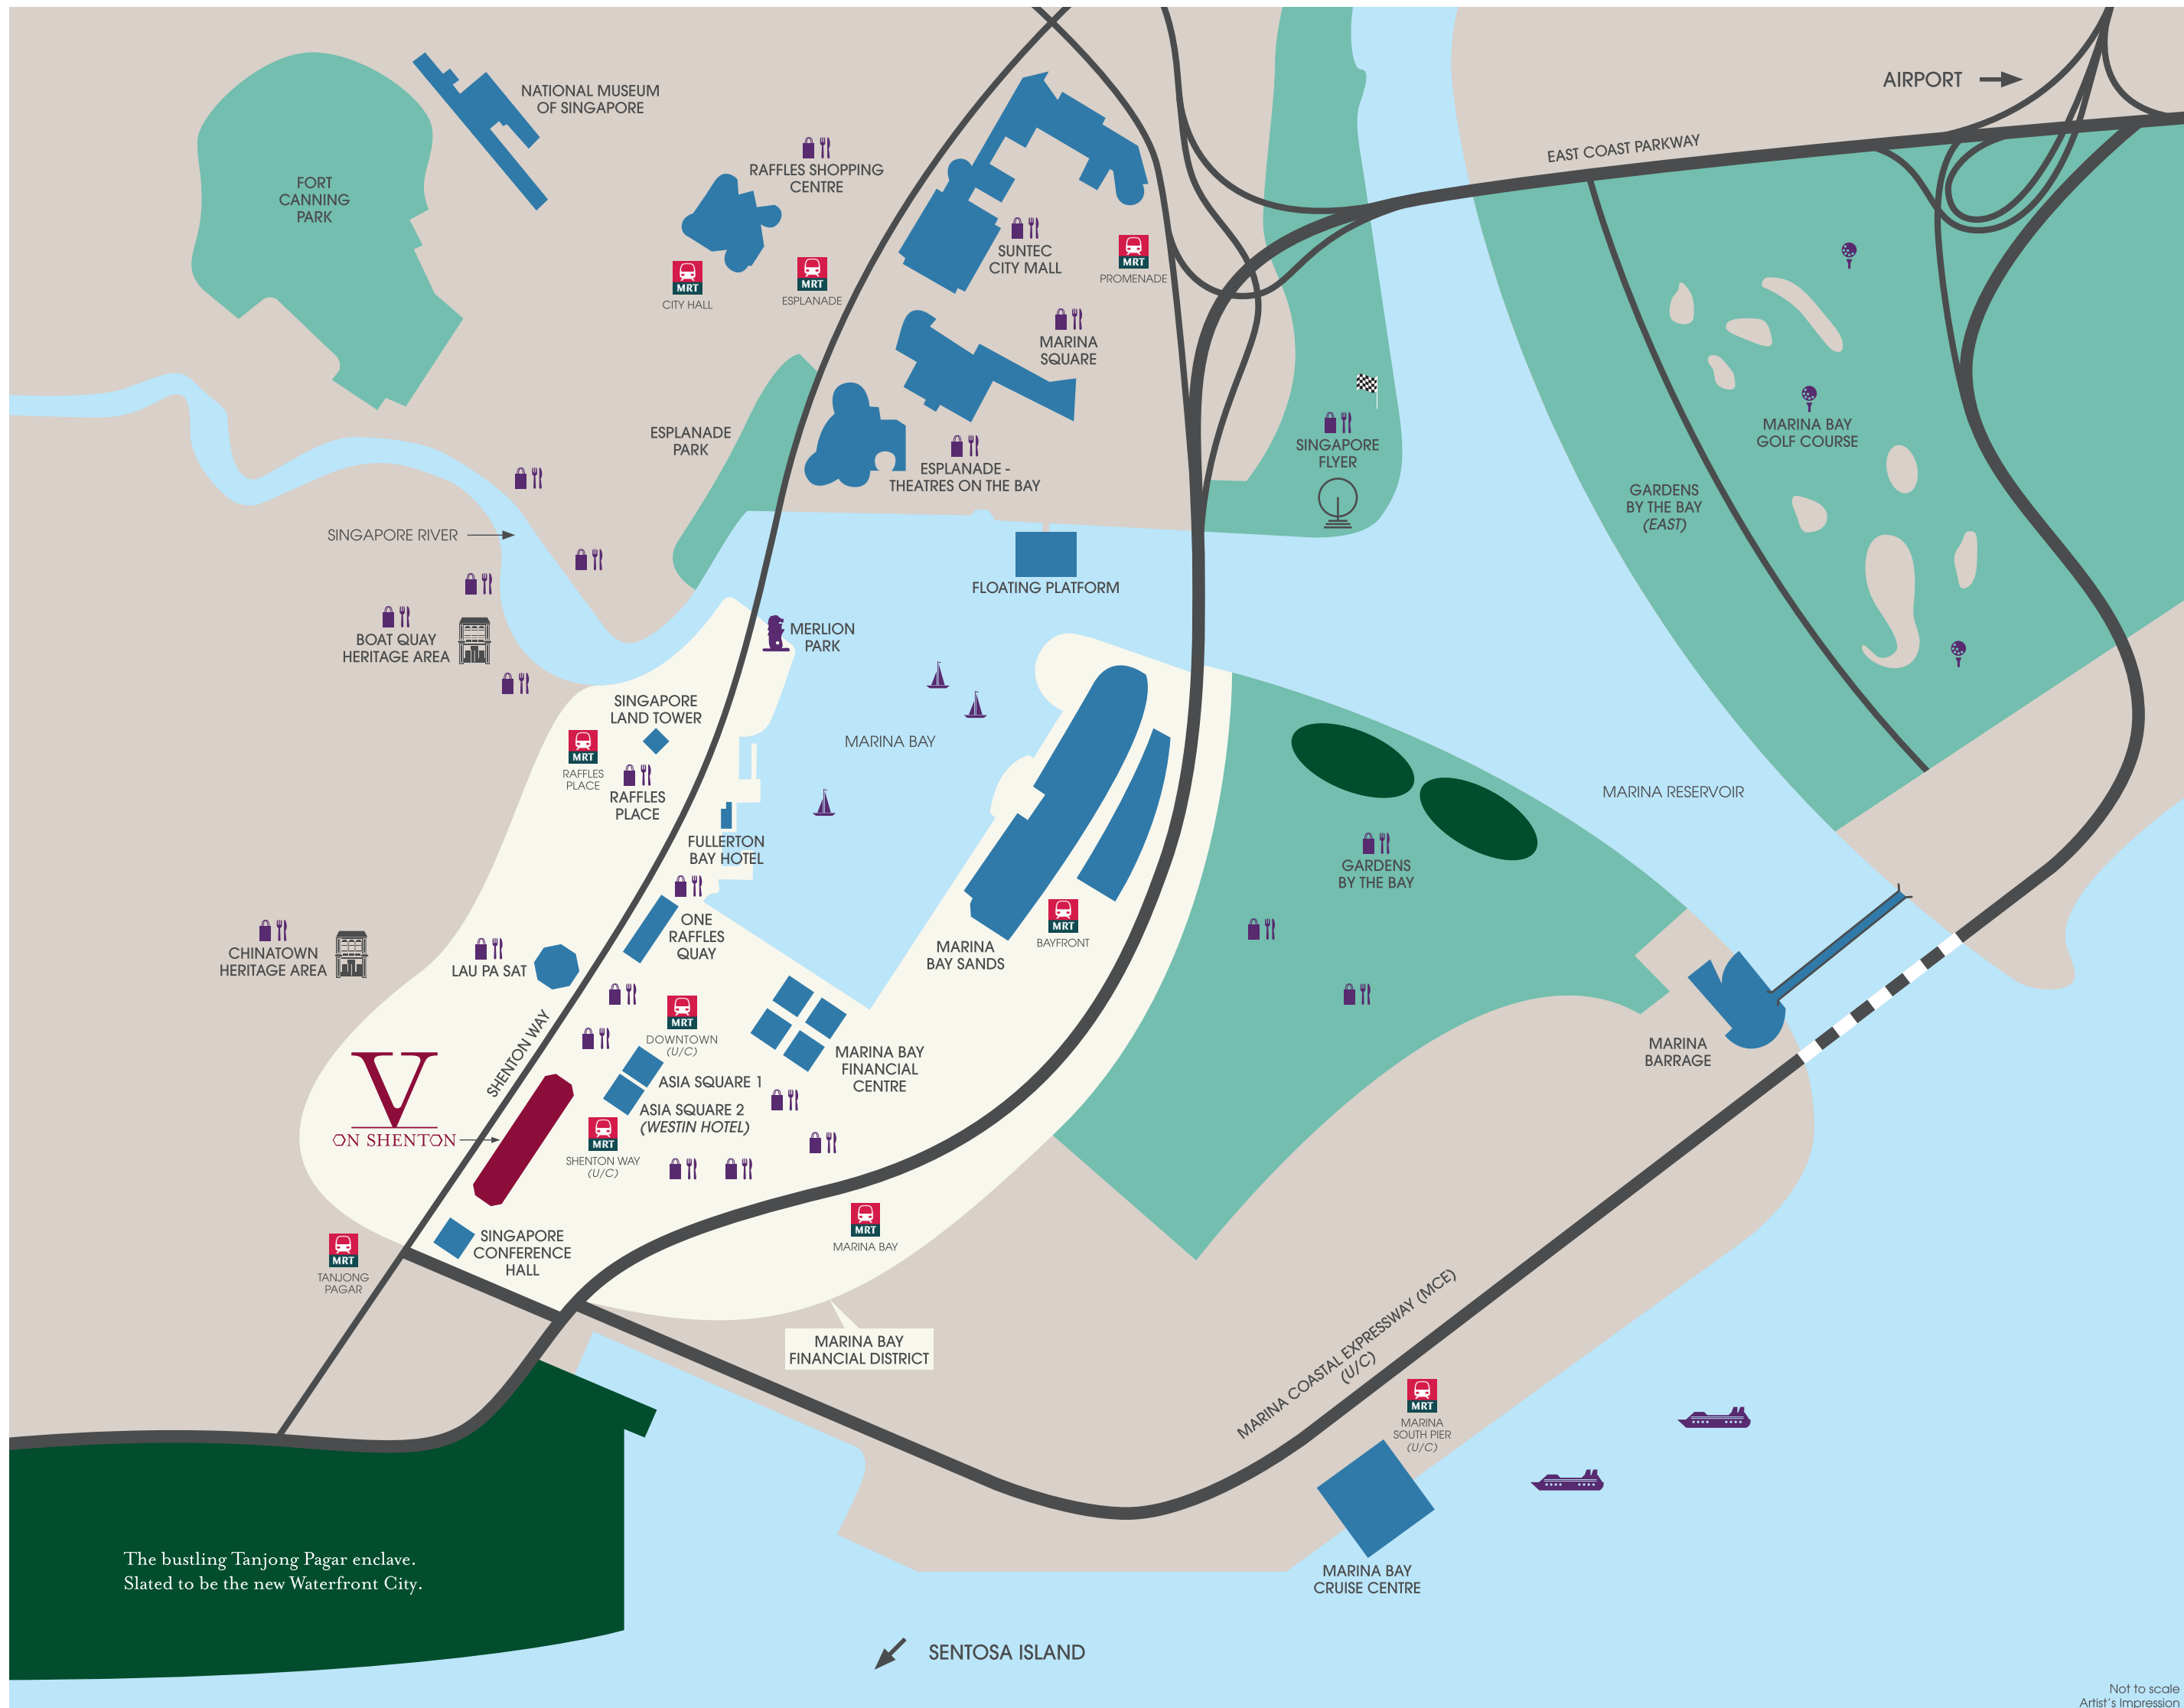

Five Shenton Way will once again be positioned in the new financial heart of Singapore. A spectacular twin tower comprising a 23-storey office building and a 54-storey residential tower, V on Shenton, will rise from the monolithic sheen of the central business district.

V on Shenton harmonises habitat and nature into a magnificent column of light, space and greenery. Using its signature organic shapes and structures inspired by nature herself, the building cultivates the sense of a sculpture that has been crafted by artisan hands to deliver the most appealing qualities of next generation metropolitan living.

Honeycomb Principle

Nature's most efficient cell for strength, the hexagon shape dominates the design of V on Shenton. These organic geometric panels also weave texture and cohesion to the development, reflecting light and pocketing shade. As you move around the building, the effect is a structure that is alive and constantly changing.

The bustling Tanjong Pagar enclave. Slated to be the new Waterfront City.

CENTRE OF IT ALL, MINUTES FROM EVERYWHERE

The ideal base for exceptional world-class city living, V on Shenton sits right on the pulse of Singapore's new Marina Bay Financial District. It is within the opportunity corridor of Asia's multi-million dollar waterfront city - Downtown at Marina Bay. Other distinguished neighbours include the new Westin Hotel (operational in 2013), Marina Bay Sands, Marina Bay Cruise Centre and Gardens by the Bay.

V on Shenton will have direct underground link to Marina Bay Link Mall and the upcoming Downtown MRT Station, which is slated for completion in 2013.

The Raffles Place MRT Interchange Station, that serves all corners of Singapore, as well as the Tanjong Pagar MRT Station, are all within walking distance.

Central Expressway (CTE), East Coast Parkway (ECP) and the emerging Marina Coastal Expressway (MCE), targeted for completion in 2013, offer seamless connectivity throughout the island.

What takes convenience to a new level is the addition of the Shenton Way Station at your doorstep, as part of the future Thomson MRT Line.

3 LUSH SKY GARDENS AND A GYMNASIUM; FOR SUN, SOUL AND SANCTUARY

V on Shenton promotes harmony from its facade design to its interior core. And nowhere is this philosophy more palpable than on its three dedicated levels of verdant Sky Gardens and sea-facing gymnasium on Level 35.

Each sky garden level is dedicated to satisfying every individual's desire to relax, have a good workout, entertain guests, or simply get away from it all. One can enjoy sweeping views of the city below, featuring well-appointed furnishings and amenities as well as an enticing medley of convivial spaces and intimate nooks.

17. NOTES

- Marble, limestone and granite are natural stone materials containing veins with tonality differences. There will be colour and markings caused by their complex mineral composition and incorporated impurities. While such materials can be pre-selected before installation, this non-conformity in the marble, limestone or granite as well as non-uniformity between pieces cannot be totally avoided. Granite tiles are pre-polished before laying and care has been taken for their installation. However granite, being a much harder material than marble cannot be re-polished after installation. Hence some differences may be felt at the joints. The tonality and pattern of the marble, limestone or granite selected and installed shall be subject to availability.
- Layout/Location of wardrobes, kitchen cabinets, fan coil units, electrical points, door swing positions and plaster ceiling boards are subject to Architect's sole discretion and final design.
- To ensure good working condition of the air-conditioning system, the system has to be maintained and cleaned by the Purchaser on a regular basis. This includes the cleaning of filters, clearing the condensate pipes and charging of gas.
- To ensure good working condition of the mechanically ventilated bathroom extraction system, servicing of all plants, equipment and system shall be undertaken by the Purchaser on a regular basis in accordance with the manufacturers' instruction or as may be demanded by the nature of the installation, operation or equipment to comply with the Authorities' requirements. In addition, the Purchaser shall undertake the servicing and maintenance of his/her respective ventilation system that runs beyond the strata unit and within the false ceiling void of the common lift lobbies.
- Timber is a natural material containing grain/vein and tonal differences. Thus it is not possible to achieve total consistency of colour and grain in its selection and installation.
- Tiles sizes and tile surface flatness cannot be perfect, and are subject to acceptable ranged describe in Singapore Standards (SS 483: 2000).
- No soil material or turf/plants are provided to the planter.
- The area described as "Study" is merely descriptive of a possible use of such area which will be provided in a bare condition. No statement or representation is made that such area is or will be fitted out for any particular purpose.
- No tiles behind/below kitchen cabinet, long bath and mirror. Wall surface above the false ceiling level will be left in its original bare condition.
- Where the Unit is provided with Roof Terrace, the Purchaser shall not cover up or erect any roof or structure over or enclosing the Roof Terrace, nor shall the Purchaser allow the Roof Terrace to be covered up or roofed over, except with the prior approval in writing from the Vendor or the Management Corporation (after the Vendor has handed over the management of the Housing Project to the Management Corporation). Written permission from the Competent Authority (URA) will be required for the alteration to the Roof Terrace.
- The Purchaser is liable to pay annual fee, subscription fee and such other fees to the StarHub Cable Vision Ltd (SCV) and/or Internet Service Providers (ISP) or any other relevant party or any other relevant authorities. The Vendor is not responsible to make arrangements with any of the said parties for the service connection for their respective subscription channels and/or internet access.
- If the Purchaser requires internet access, the Purchaser will have to make direct arrangements with the Internet Service Provider and/or such relevant entities/authorities for internet services to the Unit and to make all necessary payments to the Internet Service Provider and/or the relevant entities/authorities.
- The brand, colour and model of all materials, fittings, equipment, finishes, installations and appliances supplied shall be provided subject to Architect's selection, market availability and the sole discretion of the Vendor.

14. Where warranties are given by the manufacturers and/or contractors and/or suppliers of any of the equipment and/or appliances installed by the Vendor at the Unit, the Vendor shall assign to the Purchaser such warranties at the time when possession of the Unit is delivered to the Purchaser.

15. Glass is a manufactured material that is not 100% pure. Nickel Sulphide impurities may caused spontaneous glass breakage in a certain pieces of tempered glass that may be used where applicable. It is difficult to detect Nickel Sulphide impurities prior to breakage, which may occur in all tempered glass. The Purchaser is recommended to take up home insurance covering glass breakage to cover this possible event.
